

## AE6102 - Parallel Scientific Computing and Visualization(Spring 2023)

Team : *Sifar*(190050004, 190050062, 190050096)

Due: *April 3, 2023*

Project: *3D Visualization and Analysis of Seismic Volumes*

Project Update: *02*

### Updates

- Project GitHub repository: [https://github.com/rajagond/AE6102\\_sifar](https://github.com/rajagond/AE6102_sifar)
- We have finalized the project and submitted the final project proposal on moodle.
- We tested the **TraitsUI** library for GUI for a simple scene case of **MayaVI** and the code is updated in the *code-traitsui* folder of the repository.
- We also tested new modules implementations with our existing code in the repository, some of which are **pyside2**, **pyface** and **pandas**. We updated the README Instructions and also updated the requirements module.
